

**Hedgehog Class  
Summer 2019**

Dear Hedgehog parents,

Please find our alternative to the traditional curriculum grids.

We have a range of topics this term with a main focus upon animals and animal life. We will also be looking in to the story of Noah's Ark, which ties in nicely with the animal theme.

Now the summer months are beginning to take effect, we will be back to potting and planting and spending as much time as feasibly possible outside. We have also been gifted the opportunity to take part in weekly Forest School which is now underway.

We will still be making trips out into the community and have some exciting plans for activity week. We have new carrying slings which have been supplied to us, so will have flexibility to stretch out in parks during the warm months and access play equipment!

We will continue to work hard on our tailored physiotherapy programmes and access the various facilities within the school such as the food technology room, sensory room, swimming pool and performing arts room. Communication means also play a large role in all our activities and lessons all throughout the day and this will continue to be embedded in everything we do.

Messy play will remain a key part of our week in the form of art, cookery and just general messy play. But, we will also have time to relax with our TAC PAC session and a weekly pamper afternoon with hand and foot massages, foot spas and gentle music.

Many thanks,

Baz and the Hedgehog Team
