

JOLF is a great company that offer golfing opportunities in schools, and at weekends for children and their families. We have worked with Neil and his team across key stages 1-3 for a number of years. They have provided weekly inclusive, creative coaching sessions to our primary students; adapting their mainstream equipment so that they are able to meet the many physical needs of our students. They have also provided taster sessions to our key stage 3 students which has led to a number of them seeking further opportunities outside of school to pursue their new interest in golf. Furthermore JOLF have worked closely with our year 9 Sports Leaders on a new project 'GOSketch'. This project links golf and art, with the students working in two teams to create a sporting character that has the qualities we admire in sporting personalities, as well as a team crest. Their final designs are then printed on t-shirts which the students wear on their trip to Pyecombe golf course.
